1. Latest EFMLG contributions to various EU initiatives

The EFMLG has recently approached the European authorities with regard to several regulatory issues.

New European Securitisation Framework

In light of the experience following the entry into force of EU Securitisation Regulation on 1 January 2019, the EFMLG approached the Commission and highlighted specific issues regarding (i) the scope of application and the potential cross-border effect of the new framework and (ii) on how the new framework contributes to the real economy and the stability of the financial sector, especially in the area of non-performing loan securitisations.

<u>Proposals regarding priorities of the Capital Markets Union (CMU)</u>

The EFMLG has put forward a list of suggested priorities for legislative work to be considered by the Commission with the aim of deepening and completing of the CMU. In particular, the need for an EU regulatory framework on cryptoassets and Initial Coin Offerings was highlighted in the EFMLG letter.

Proposal for a directive on credit servicers, credit purchases and recovery of collateral

In its letter to the Commission, the EFMLG strongly supported the initiative as being instrumental to deal with the issue of non-performing loans in the EU. At the same time, the EFMLG urged further progress with respect to extrajudicial enforcement of collateral and provided some comments regarding the proposal, in particular promoting a uniform and predictable enforcement mechanism for security rights over movable and immovable assets in the EU.
